Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1, 2, and 9-20, drawn to a product and a method of producing moss grown in nutrient solution containing phytohormone.

Group II, claims 3-8, drawn to a method of growing young moss seedlings in oxygen, photosynthetic active photon flux, temperature, and light/dark periods.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The invention of Groups I-II was found to have no special technical feature that defined the contribution over the prior art of Hiraoka (U.S. Patent No. 5,476,523).

Hiraoka teach moss seedling and method of producing moss in liquid culture medium under light condition at temperature of 25°C (see Example 1).

Therefore, the technical feature linking Groups I-II are not special over the prior art, and the Groups are not so linked under PCT Rule 13.1.

Applicant is reminded that a determination regarding unity of invention is made without regard to whether a group of invention is claimed in separate claims or as alternatives within a single claim (MPEP 1893.03(d), last paragraph).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
